## **by jeff hanna - rowan university**

by jeff hanna abstract? magnetic random access memory holds the potential to replace all different types of memory as the only candidate for true “universal” memory. memory is an

element that is in every single computing device.

### **cell shape and patterning considerations for magnetic**

introduction industrial and academic development laboratories worldwide are working to perfect the circuit designs, fabrication methods and integration schemes required for successful commercial production of magnetic random access memory (mram) devices, a new kind of nonvolatile memory technology that

### **f-ram, nvsram, and mram magnetic field immunity**

magnetic field immunity introduction nonvolatile random-access memory (nvram) is memory that provides fast read and write access to any address and retains data when power is disrupted. ferroelectric random-access memory (f-ram<sup>TM</sup>), nonvolatile static random-access memory (nvsram), and
